Mary Lind Crowe PhD, RN APHN-BC

Mary Lind Crowe is the course coordinator for the senior level nursing course, Health Care Policy and Global Health. She earned her doctorate from the University of Akron and completed her graduate work at Case Western Reserve University. She holds ANCC certification in Advanced Public Health Nursing.

Dr. Crowe’s longstanding clinical interests are in the provision of nursing care in community settings including those services delivered through the nation’s public health system.

In the Health Care Policy and Global Health nursing course, senior level students focus on population health and health care decision making. Clinical assignments are arranged at many different outpatient sites throughout northeast Ohio. Some of those sites include federally qualified outpatient clinics, wound centers, drug and alcohol treatment programs, the CornerStone of Hope, a Hispanic community center, and homeless shelters.
