

Family Nurse Practitioner

BSN-DNP

Curriculum Guide

Family Nurse Practitioner

The Family Nurse Practitioner (FNP) track builds in the content from the Adult-Gerontology Nurse Practitioner course work and prepares students to provide primary health care to individuals and families across the life cycle.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) is designed for nurses seeking a terminal degree in nursing practice and offers an alternative to research-focused doctoral programs.

The Breen School of Nursing, Doctor of Nursing Practice program emphasizes development of nurse leaders who use evidence-based practice for optimizing health care delivery through effective systems transformation. The curriculum for the DNP degree includes advanced practice, leadership and application of clinical research. Graduates with this terminal practice degree will be prepared for roles in direct care or indirect, systems-focused care.

The Breen School of Nursing, Doctor of Nursing Practice program focuses on the development of nurse leaders who use evidence-based practice for optimizing health care delivery through effective systems transformation. As DNP graduates plan and implement their practice with individuals and populations, they learn to integrate the spiritual, biological, social, psychological and cultural factors that influence human responses to health and illness. The goal of DNP practice, in addition to providing excellent care to patients, is to optimize health care delivery through effective systems transformation, or planned change.

The DNP is structured as a year-round program with courses completed during the fall, spring and summer semesters. Students admitted to the DNP program may complete the program in 24 months through the full-time option. The part-time option allows students to spread the curriculum across a four-year time span by completing one course per semester.
